Get started with your SAVER

Welcome to the start of your Field-to-Lab journey that begins with the SAVER environmental data recorder. SAVERs are designed to capture and record critical dynamic data during transport and handling of your products. Through strategic use of these rugged, reliable instruments, you're taking the first step towards ensuring your products are delivered in optimal condition. Capture the accurate environmental data you need to help monitor and improve your logistics operations.

SAVER 9X30

Shock and vibration field data recorder

Get help with your data analysis

Introducing Field-to-Lab Consulting: Our expert engineers bring extensive experience to the table, offering personalized consultations to help you get the most out of your SAVER data:

Data collection guidance

We assist you in understanding and analyzing the data you've collected, providing actionable insights to enhance your operations.

Data analysis

Whether you're new to data collection or looking to refine your process, our team ensures you gather data correctly and efficiently.

Get ready to simulate the impact

From data collection and interpretation to replicating tests in a controlled lab environment, we provide comprehensive support to ensure the accuracy and reliability of your results. Our advanced test systems can simulate real-world conditions, allowing you to repeat product testing to optimize both product and packaging for greater durability, ensuring your products meet the highest standards.
